the blood as it is required by many. Today accidents have increased and blood is very much in need for each and every hospital, we students don't feel so much responsible to go to blood banks and donate the blood, therefore conducting such events in college would surely make us aware of our health as well as the need of blood in this world. The huge words and quotes on the posters had an impact on the students, attracted us and made us to donate the blood. The camp is organized in a much disciplined manner checking each and every aspect of our health.
